

INTRODUCING
IFD Aero

The latest in **Intumescent Fire Damper** technology.

Aerodynamic blade
design, assured
performance and
total confidence.

A revolutionary 'breath of fresh air' in building safety and peace of mind.

A leap ahead for the best buildings

A new generation of intumescent fire dampers (IFDs) is set to open up new opportunities for specifiers and installers.

For 20 years, Kilargo's fire dampers have provided high performance fire protection solutions.

Our revolutionary new blade design*, the IFD Aero, takes that effectiveness to an unprecedented level. With less noise, greater levels of system efficiency and based on years of industry consultation, it's a smart step forward for quality constructions.

*Patent pending in Australia and the UK (UK Patent Application No. 1607085.6).

The aerodynamic difference

So, what's the secret? IFD Aero's clever design lets air cut straight across the blade, delivering a host of new benefits.

You can count on it to perform every day: providing virtually unobstructed and trouble-free ventilation under normal conditions, with total closure in a fire event.

Less:

- airflow resistance
- pressure drop
- noise.

More:

- laminar airflow
- peace of mind
- energy efficiency
- potential for reduced fan/duct sizing
- flexibility in designs
- confidence in exceptional performance and compliance.

Incredible quality, unbelievable value

Its rigorously tested, state-of-the-art design is fully compliant with the latest Australian and New Zealand construction codes.

Of course, it comes with all the benefits that Kilargo's IFD products have delivered for over 20 years, including:

- slimline, robust construction
- no moving parts
- super-low maintenance regime
- superb service, no fuss
- superior quality and reliability, all proudly manufactured in Australia.
- reliable and assured technical support from specifier to installer

The IFD Aero Difference

**Laminar
airflow**

**Comfortable
ventilation**

Quieter

**Energy
efficient**

**Performance
tested**

**No extra
costs**

**Potential to reduce
fan or duct size**

**Available across Kilargo's
full IFD range**

**Fully compliant with all the
latest Australian Standards**

Kilargo

At Kilargo, we provide simple and smart solutions to maximise the safety, comfort and performance of commercial and multi-occupancy buildings. Our integrated and cost-effective solutions are designed to contain the spread of fire, smoke and sound with many also providing energy savings.

Kilargo is built on a 30-year commitment to be the best. We stand proudly at the forefront of the industry, delivering products that lead the way in design, manufacturing and quality. We are a proud Australian manufacturing company with a global presence. Our products are rigorously, independently tested for performance. For us, it's about providing exceptional solutions for great buildings: helping you meet regulations, protect people and property, and enhancing wellbeing.
