## Installation detail:
Meeting Stile

|	
Step 1	Remove the seal from the packaging and measure the glass panel height to determine the seal length required.
Step 2	Clean the edge of the glass panel using Isopropyl alcohol or similar to ensure it is free from oil, grease or dust. (This is most important)
Step 3	Using scissors / side cutter, trim the seal to the glass panel height.
Step 4	Use the seal fitting tool in order to ensure the seal is applied centred and straight to the glass panel edge. Progressively pull the backing tape off the seal while running the fitting tool down the glass panel edge.

Important
Ensure that the installation of this product does not impede the opening or closing of the door.

Note
Recommendations as to methods for use of materials and construction details are based on the experience and knowledge of Kilargo and are given in good faith as a general guide and service to designers, contractors and manufacturers. Kilargo reserves the right to make alterations or delete any installation detail without prior notice.
