

Installation Instructions: Air-Transfer

Alternative Fixing Methods

Z Bracket Fixing

Angle Fixing

- Step 1** Position damper centrally in penetration aperture as per system drawing with temporary supports or packers.
- Step 2** Fasten mounting angles or brackets to damper with steel self-drilling screws or steel pop rivets and to the building element with appropriate mechanical fixings as per system drawing.
- Step 3** Apply Kilargo Intumescent Mastic (supplied separately) to the gaps between the damper & building element. Ensure fill depth corresponds with those detailed in the system drawing.
- Step 4** Ensure product and certification labels are in a prominent position for easy identification during subsequent maintenance inspections.
- Step 5** Fix grilles, louvres or vermin proof mesh independently to each side of the building element.

System Notes

- Grilles, louvres, vermin proof mesh, angles, brackets & fixings are to be supplied by others.
- Grilles to be fixed independently to the building element and shall not be fixed to the fire damper.
- Kilargo Intumescent Fire Dampers shall be installed in accordance with this detail, including the use of Kilargo Intumescent Mastic and in accordance with the requirements of AS1682.2
- Ensure convenient access is provided for visual inspection and cleaning as necessary
- 2mm Minimum gap allowable between damper and aperture. For gaps between 2-5mm, a fillet of Kilargo Intumescent Mastic shall be applied.

Building element:	Dintel
Application:	Cell only - Air Transfer with grilles or flat vermin proof mesh
Maximum size:	600 x 600
FRL	-/120/120
Test reference No.	FAS200229

System No. WD1i
